

軟體電話測試情境

星期四, 五月 4, 2023 10:49 上午

不同帳號 登入同分機

A帳號(先打開軟體電話)	
B帳號(後打開軟體電話)	 The screenshot shows the MoneyIn software phone interface. At the top, there's a status bar with '未登入' (Not logged in) and a timer '59 : 01'. Below this is a numeric keypad with digits 1-9, *, 0, and #. At the bottom, there are several function buttons: '轉接' (Transfer), '保留' (Hold), '待機' (Standby), '外撥' (Outgoing call), '文書' (Document), '開會' (Meeting), '支援' (Support), '洗手間' (Restroom), and '用餐' (Dining). There are also input fields for '代碼: obtest' and '分機: 41498'. A yellow dialog box is overlaid on the screen, displaying the message '分機已有其他人使用, 請確認後重新登入' (The extension is already being used by someone else, please confirm and log in again) with a '確定' (Confirm) button.
B帳號按確定按鈕後A帳號畫面	

(如在電話中 能正常講電話 但軟體電話也會跳到此畫面
但還是會產生小結)

如果B帳號再點擊一次軟體電話按鈕
就能開啟軟體電話使用
